

Renal System Support

Renal disease can be a complex and challenging clinical problem to manage both short-term and long-term. Not only should the kidneys be supported but consideration should also be given to support the liver, cardiovascular system, and the autonomic nervous system. Standard Process Renal Support facilitates rehabilitation of the kidneys and support of these other important tissues in a multiple ways through its range of whole food nutrients, tissue extracts and concentrates, and botanical ingredients. This product can be used alone or in conjunction with other management methods for a variety of renal and urinary disorders, in conjunction with pharmaceuticals that are known to stress the kidneys, and during recovery from renal trauma. Examples of renal and urinary disorders that can benefit from this product include chronic renal failure and cystitis.

Suggested uses:

1. Kidney disease
2. Kidney stones
3. Urinary tract infection
4. pH regulation
5. Fluid balance problems
6. Secondary liver support

Brochure Text

When issues with your pet's kidneys arise, not only should the kidneys be supported, but consideration should also be given to supporting other organs that play a role in the function of the kidneys. Canine Renal Support and Feline Renal Support help facilitate the natural rehabilitation and support of the kidneys as well as other important tissues. Through their range of whole food nutrients, Canine Renal Support and Feline Renal Support provide support for kidney tissue along with ingredients that support the heart, liver, adrenal glands, autonomic nervous system, and the mucus membranes.

Canine Renal Support and Feline Renal Support can be utilized in all patients with kidney disorders. In addition to kidney support, they may be beneficial for patients with lower urinary tract and bladder problems. In conjunction with medical management or on their own, Canine Renal Support and Feline Renal Support are important tools in managing your pet's health.

As always, your veterinarian and Standard Process have your pet's well-being in mind. You can rest assured that the addition of nutritional support is part of a well-rounded healthcare plan for your pet.
